

Real-time Linux-based broadcast automation

OVERVIEW

Upload, schedule and play all of your programs on QuickCast with zero transcoding required. QuickCast is operated over a web browser interface, which means you can access your content from anywhere on any device. QuickCast gives you the ability to air one live input while recording it to disk, overlay up to four regions on top of scheduled playout, store 4TB of programming and more - all in a single sleek 2RU chassis. QuickCast is a great low cost, feature rich solution for only \$9,995.

FEATURES

- Zero transcoding - HD/SD compatible out of the box
- Upload & schedule a program in seconds
- Edit videos on a non-linear timeline in our web UI
- Add graphic overlays on your channel in seconds
- Automatically normalize audio volume on channel
- Record a single incoming video input in HD or SD
- Monitor your channel from the web UI
- Create a text crawl in seconds, with support for RSS
- Play background music during slides automatically
- Automatically fill gaps in schedules
- Reliable and attentive support with C4

ADDITIONAL OPTIONS

- Additional recordable/live input
- Additional storage - 6TB or 8TB upgrade
- Additional RAID-1 option

Internal dynamic messaging capability with support for text, graphics and video along with automated coming up next functionality.

Web browser based user interface.
